Description of Project:

To improve customer experience, operational efficiency and allow for increased service, Link Transit plans to create an off-street Passenger Transfer Hub (Transfer Hub) and

construct a new Operations and Maintenance (O&M facility). All routes converge at the temporary Transfer Hub, which utilizes curb space adjacent to a parking lot to facilitate all passenger transfers with two bus shelters and no operator amenities/comfort facilities. An off-street Transfer Hub would support safe transfers and provide basic amenities like passenger restrooms, customer service window, and separated operator comfort facilities/administrative space. Link Transit currently has a contractor that leases space for the O&M facility, an \$80,000 with a 3.5% increase each year.

Link Transit will also procure a diesel hybrid transit bus, expanding the fleet in order to operate an additional frequency on two routes to ensure those routes maintain a 60 minute headway like the rest of the transit system.
